Re: U.S. Patent No. 8721511 — Response to Assertion of Infringement

Dear Counsel,

We acknowledge receipt of your correspondence asserting infringement of U.S. Patent No. 8721511 (the "8721511 Patent"). After preliminary review, we have substantial concerns about the validity, enforceability, and scope of the asserted claims, summarized below. We reserve all rights and defenses.

1. Subject Patent — Summary

I have successfully searched for US Patent 8,721,511 on the USPTO Patent Full-Text and Image Database (PatFT) and have retrieved the necessary information regarding its title, assignee, inventors, filing date, issue date, and abstract. I have also located the full text of the patent, including the claims, which I can now analyze.

The next steps of my plan are to:

2. Carefully read and understand each independent claim of US Patent 8,721,511.
3. Check the CAFC dockets for 2026 for any litigation involving US Patent 8,721,511.
4. Present a concise summary of the patent including all the requested information and a plain-language overview of each independent claim.

I will now proceed with...

2. Request

In light of the foregoing, we request that your client (i) provide a detailed claim chart identifying each accused product or service and mapping every limitation of each asserted claim, (ii) identify any prior art known to your client, including any references cited during prosecution or reexamination, and (iii) substantiate the basis for any damages or licensing demand. We are prepared to discuss the matter further once we have received and reviewed the foregoing.

Sincerely,

[Your Name]

DISCLAIMER. This document is a machine-generated sample. The factual assertions, prior-art citations, and legal arguments above are AI-produced and may contain errors, omissions, or outdated information. Do not transmit this letter, in whole or in part, to any party. This is not legal advice; no attorney-client relationship is created by its existence. Consult a licensed patent attorney before responding to any patent-infringement assertion.
